

## Ski-ing Sierra Nevada

Ski-ing in the Sierra Nevada is only a one hour twenty minute drive from the Mediterranean and to most of the holiday properties listed on Rent Costa Tropical - many of the properties listed are closer.

Families often look for rental properties over the winter months in the area and enjoy the possibility of accommodation near the beaches and coastal towns yet be in reach of the Sierra Nevada ski resort. Something of interest for everyone! It is often said, and it is very true, that you can ski in the morning and return in the afternoon to relax on the beach or sit round the pool in the afternoon sunshine.

Due to its geographical location, the coastal area enjoys a microclimate, subtropical in character, a warm and gentle 18 degrees in winter and an average of 25 degrees in summer.

The Sierra Nevada ski resort has 79 runs (approx 84 kms) and includes a snowboard park, cross country ski-ing circuit (4 kms), ice rink, tobogganing area, paralel slalom course, group and private tuition, ski/snowboard equipment hire, ski clothing hire, shops and supermarkets, cyber cafe and a cinema.

For an informative resort overview, ski tuition, weather reports and hotel reservations we recommend a visit to the Sierra Essence website.
